

## Senior Director, Pharmacology

Y-mAbs Therapeutics is looking for a Senior Director, Pharmacology for our R&D Science, non-clinical Development and Translational Medicine department located in Hørsholm, Denmark.

Y-mAbs is a late-stage clinical, global biopharmaceutical company focused on the development and commercialization of novel, antibody-based therapeutic products for the treatment of cancer. We have a broad and advanced product pipeline, including pivotal-stage product candidates against a range of targets and including one FDA-approved product (Naxitamab).

### Primary Responsibilities

As Senior Director, Pharmacology at Y-mAbs, you will be responsible for early clinical pharmacology strategies for new and existing projects, be part of the safety decision-making, and represent early clinical pharmacology in cross-function teams. In addition, your responsibility will involve challenging the early clinical pharmacology strategies and leading in designing and setting up programs for the early pipeline for the SADA studies, from proof of concept to first studies.

Furthermore, you will be responsible for forwarding all submissions to the authorities (FDA/EMA), hereto develop portfolio strategies, budgets, and forecasts, be in charge of CRO oversight and agreements, and direct and cooperate with the Study Managers.

Other responsibilities include:

- Participate in the leadership team for new SADA molecules development within alpha and beta emitter space
- Participate in the leadership team for new development for SADA imaging
- Patent strategy – alignment with external and internal stakeholders
- Co-lead generation of documents for regulatory submissions focusing on pharmacology sections (e.g., IND/CTA)
- Work cross-organizational with the Theragnostic Group in collaboration with the Director Toxicology
- Combine new, theoretical data with practical assessments and studies

### Required Qualifications

Your qualifications are a minimum of 7 years of relevant and significant clinical research experience across a broad spectrum of Clinical Pharmacology, with solid knowledge of how chemical agents, natural as synthetic, affect biological systems. You have a track record of drug submissions/approvals, a strong scientific mindset, and practical experience with non-clinical drug development and planning and conducting non-clinical projects and programs. You have experience with health authority interactions and submissions and can navigate in a cross-functional company. You are preferably fluent in Danish, written as spoken.

You have an M.Sc. / medical degree in Life Science, Clinical Pharmacology, Molecular Biology, and/or Veterinary or a related scientific field.

### **Success criteria**

It is paramount that you are passionate about the therapeutic area and that you are able to bring your pharmacology knowledge into practice.

You have strong communication and project management skills and can engage and encourage multiple initiatives in a fast-paced environment where you thrive. Furthermore, you enjoy being proactive and hands-on on various projects and tasks and seek delegation of necessary. This role has significant impact on Y-mAbs pipeline, which is why continuous support, contribution, and provision of your clinical pharmacology expertise is essential. Also, your ability to build strong working relationships is key.

### **Travelling**

You will be travelling approx. 10 days per year.

Y-mAbs employees are based in Denmark as well as the US. This position is based in Denmark.

### **To apply**

Unique Human Capital (UHC) will assist in the recruitment process. You can apply through UHC website directly – click this link [Senior Director, Pharmacology](#) or by sending an email to [HR@ymabs.com](mailto:HR@ymabs.com). Please mark your application with **Job ID no. 1078**. Your application must be in English and will be treated confidentially.
