

Medical Science Liaison

Are you ready to uplevel your career? Join an innovative biopharmaceutical company and be part of our exciting journey!

We are looking for a Medical Science Liaison to join our team.

Working with Us

At Y-mAbs Therapeutics (NASDAQ: YMAB), our mission is to become the world leader in developing better and safer radioimmunotherapy and antibody-based oncology products addressing clear unmet pediatric and adult medical needs. With the right partnerships and collaborations, we envision changing the course of cancer treatment and improving outcomes for patients and their families.

We have offices in **New York City (US)** and **Hørsholm, Denmark** (near Copenhagen). We also have a laboratory based in **Nutley, New Jersey (US)**.

Y-mAbs has an exciting future ahead. If you are passionate about being part of a truly patient-centric organization focused on developing and commercializing cutting-edge therapies to treat a variety of cancers, we want to hear from you!

About the Role

Y-mAbs seeks a Medical Science Liaison (Central Territory: Illinois, Minnesota, Ohio, Michigan, Indiana, Wisconsin, Iowa, Nebraska, North Dakota, and South Dakota) who will establish, build, and maintain partnerships with major academic institutions, academic key opinion leaders (KOL), and external experts. They will develop and maintain an advanced level of knowledge about pertinent studies, compounds, and diseases that would facilitate peer-to-peer scientific exchange with leading oncology thought leaders.

Key Responsibilities

- Serve as a medical/scientific resource to external and internal partners, including clinical trial sites and the Clinical Development & Operations organization.
- Develop and maintain a strategic territory and tactical plan to deliver on Medical Affairs (MA) strategic goals and objectives.
- Identify and report strategic and business-relevant scientific/medical field insights.
- Serve as a scientific resource to internal and external partners to support business-critical activities.
- Provide education to nurses and other healthcare providers on Y-mAbs FDA approved products.
- Collaborate with cross-functional colleagues to support and meet shared Y-mAbs goals.

- Ability to identify/recommend clinical trial sites for Clinical Development & Operations and assist with recognizing enrollment barriers/challenges.
- Consistently demonstrate a high standard of excellence in managing assigned territory while contributing to the success of colleagues and the MA organization as a whole.
- Respond to unsolicited requests for information from stakeholders by sharing appropriate data regarding marketed and pipeline compounds in a timely, compliant, and stakeholder-focused manner.
- Represent Y-mAbs at medical/scientific conferences, research group meetings, advisory boards, investigator meetings, and other external engagements, as well as provide insights and meeting summaries.
- Continually educate self on new scientific developments in oncology, ensure continuous rigorous Y-mAbs products / clinical assets knowledge and understanding of the global market landscape and changing trends.
- Conduct all activities in accordance with current regulatory, health care, and company compliance guidelines.
- Senior Level MSL functions at a high level of engagement with internal and external customers:
 - Serve as a scientific expert to all internal teams and provide training when needed.
 - Lead or assist with assigned MA projects, such as preparation for scientific congress or advisory boards.
 - Collaborate with internal stakeholders on business-critical cross-functional projects.
 - Possess an understanding of the territories and their specifics at a national level to be able to support and cross-cover territories.

Key Qualifications

- A Doctorate level degree or equivalent experience is required (i.e. PharmD, MD, PhD, PA or ANP)
- Candidates with radiopharmaceuticals/radioligand/theranostics oncology experience are highly preferred.
- In-depth scientific and therapeutic knowledge and experience in the Oncology therapeutic area required.
- Experience with pediatric oncology and understanding of the treatment landscape is preferred.
- Must have at least three years of industry experience in an MSL role. Seniority Level commensurate with the candidate's background and expertise.
- Strong record of building meaningful professional relationships with top leaders in the field of oncology.
- Quickly and accurately learn, retain, and present detailed scientific information.

- Ability to understand and translate complex scientific data into clear and engaging scientific communication.
- Ability to summarize and communicate complex information and business objectives in a concise and effective way for important decisions.
- Possess outstanding organizational and time management skills, proven ability to prioritize efficiently and effectively manage multiple complex projects and deliver objectives. Strong attention to detail.
- Exhibit high work ethics and operate with high integrity and professionalism.
- Embrace change, embody a continuous improvement mindset, and exemplify agile principles in day-to-day activities.

This is a field-based role, and the successful candidate must live within and be able to travel throughout the territory of Illinois, Minnesota, Ohio, Michigan, Indiana, Wisconsin, Iowa, Nebraska, North Dakota, and South Dakota.
