

Senior Statistical Programmer

Y-mAbs is a listed biotech company based in Hoersholm and New York. We develop new treatment options for pediatric cancers. Y-mAbs Therapeutics A/S (Y-mAbs) is expanding and is now looking for an experienced Senior Statistical Programmer in a newly established position.

Are you our new Senior Statistical Programmer in a busy and ambitious working environment? This is your opportunity to join a dedicated team of professionals and become an important part of the Clinical Development staff of an innovative biopharmaceutical company.

Y-mAbs is facing an exciting time planning for BLA and MAA submissions, as well as initiating clinical development for new projects.

As Senior Statistical Programmer you will have a key role in all our ongoing and future projects and activities. With support from a CRO, you will manage our newly established SAS installation, build and maintain macro libraries and be responsible for the day-to-day maintenance of the system. However, the focus will be to support our clinical development programs. This will encompass programming of exploratory analyses based on our extensive clinical data, validation of data and outputs received from CROs, oversight with the CROs programming activities, and programming of analyses for abstracts and presentations. You will thus actively be supporting Y-mAbs' overall goal of developing new and innovative cancer treatments.

We work in close collaboration with CROs and you will be involved in securing the information to and from these related to programming activities. Moreover, you will be responsible for proper documentation and record management.

You will report to the Director of Biometrics and be an integrated part of the Biometrics team in direct interaction with Statisticians and Data Managers. You must have the ability to work independently but also as an effective and engaged team member in a fast-paced environment.

Key responsibilities:

- Defining Y-mAbs standards for statistical programming
- Maintain and build a new and shiny SAS environment (in collaboration with CRO)
- Facilitate and support programming activities conducted by statisticians and data managers
- Statistical programming for
 - Exploratory analyses for design of new studies
 - Abstracts and presentations
 - Validation of data sets (CDISC as well as proprietary)
 - Validation of output for BLA and MAA submissions
 - DMC, DSUR, and IB input
 - Other ad hoc purposes
- Participate in the oversight of CRO programming activities across development programs
- Contribute to the continuous improvement of Y-mAbs' procedures and secure best practices
- Keep up to date with regulatory guidance for programming and data standards

Personal and professional qualifications

- You have at least 5 years of experience as Statistical Programmer, preferably at least 2 years at a senior level
- You have experience with data standards especially CDISC
- You have experience with maintenance of a SAS environment
- You have experience working with CROs
- You enjoy communicating directly with stakeholders within medical, safety, data management, and statistics and facilitating their various needs for programming support
- You are service-minded and self-driven
- You have a university degree within Natural Sciences
- You have analytical skills and the ability to work with large amounts of information
- You are structured with an eye for detail
- Our company language is English, so your communication in both written and spoken English is fluent

YmAbs offer:

- An exciting work environment where challenging assignments will come your way
- Great office location at DTU Science Park including canteen and easy parking
- Competitive salary package

For more details about the job or our company, please contact René dePont Christensen (Director of Biometrics) at +45 5379 1088. Please note that all applications must be submitted in English and will be treated confidentially.

Please note that all applications must be marked with position ID number: 1004, submitted to hr@ymabs.com.

Deadline: 20 March 2020. We will initiate interviews in a rolling manner as applications for the job are received.
